John P. Lalor

Research Interests

My research is in machine learning and natural language processing. I am particularly interested in model evaluation and quantifying uncertainty, as well as applications in biomedical informatics.

Education

2019 (expected) **Ph.D. Computer Science**, University of Massachusetts, Amherst, MA.
Advisor: Hong Yu

2015 **M.S. Computer Science**, DePaul University, Chicago, IL.
Graduated with Distinction

2011 **B.B.A. IT Management**, University of Notre Dame, South Bend, IN.
Minor: Irish Language and Literature Graduated Cum Laude

Professional Experience

2018 **Applied Scientist Intern**, Amazon Alexa, Cambridge, MA.
Supervisors: Bill Campbell and Eunah Cho
I investigated ways to incorporate paraphrases as training data for semi-supervised machine learning models. I developed an embedding model for customer utterances that embeds paraphrase information. Analysis of these embeddings showed that they could be used to identify training data in both semi-supervised and active learning frameworks.

2015 - present **Research Assistant**, BioNLP Group, Amherst, MA.
Supervisor: Hong Yu
In the BioNLP lab I conduct research on improving patient health literacy and Electronic Health Record (EHR) note understanding. I developed the ComprehENotes test, the first test of EHR note comprehension available, using de-identified patient notes and Sentence Verification Technique to generate questions, and Item Response Theory to deterine which questions to include in the test. I have used the ComprehENotes test to validate a previously self-reported results that EHR note comprehension is improved when patients are given the NoteAid tool to define medical terminology in the EHR note. I am also developing a machine learning model for identifying cases of hypoglycemia in patient secure messages with their health care providers.

2017 **Applied Scientist Intern**, Amazon Alexa, Cambridge, MA.
Supervisors: Imre Kiss and Francois Mairesse
I implemented a new internal metric to predict whether a customer request would be actioned correctly by Alexa. Using this metric I developed new regression tests for production model development, and developed a new semi-supervised technique for identifying apropriate unlabeled data for inclusion in training sets.

2016 **Intern**, ESPN Advanced Technology Group, Bristol, CT.
Supervisor: Zvi Topol
I developed a text summarization model to extract short summaries from ESPN articles that could be presented as smartphone notifications or social media posts.

2015 **Teaching Assistant**, Introduction to Computer Science, Amherst College, Amherst, MA.
Professor: Crystal Valentine
As TA I held weekly office hours, assisted students during weekly lab session, and graded weekly lab programming asssignments. I also prepared and gave two lectures during the semester.

2013 - 2015 **Software Developer**, Eze Software Group, Chicago, IL.
I designed and built a notification system to alert customers when trade orders are completed via email and text message. I also designed and built an administrative dashboard for our case management system that filtered and displayed case information for 1000+ cases across 30+ clients. I was the team lead for updating code and fixing bugs for internal case management, account management, and incident resolution systems.

2011 - 2013 **Advisory Sr. Associate**, KPMG, Philadelphia, PA, Chicago, IL.
I coordinated and performed General IT Control and application control testing for large and mid-size companies across various industries as part of IT Financial Statement Audit Support teams. I also developed an automated user access testing application to identify terminated employees across application access lists.

Honors and Awards

2018 UMass CICS Travel Grant recipient

2015 DePaul University Graduate Assistantship

2015 Inducted into the Upsilon Pi Epsilon computer science honor society, DePaul chapter

2007 - 2011 Dean's List 4 semesters at Notre Dame

Tutorials and Invited Talks

11/2018 Evaluation and Interpretability in Deep Neural Networks. *American Medical Informatics Association (AMIA) Annual Symposium* Instructional Workshop, 2018. With A. Jagannatha and H. Yu.

10/2018 ComprehENotes: A New Test of EHR Note Comprehension. *University of Notre Dame Mendoza College of Business.*

09/2018 Leveraging Uncertainty for Better DNN Training and Evaluation. *UMass Lowell Data Science Lecture Series.*

09/2017 Building Better Evaluations using Item Response Theory. *University of Notre Dame Natural Language Processing Group.*

12/2016 Building Evaluation Scales for NLP using Item Response Theory. *UMass CICS Machine Learning and Friends Lunch series.*

Service

Teaching and Mentoring Experience

Fall 2018 **Instructor**, UMass Lowell Data Science Lecture Series, University of Massachusetts Lowell.
Prepared and gave three lectures on evaluation and interpretability in deep neural networks

Fall 2018 **Instructor**, CICS First Year Seminar, University of Massachusetts Amherst.
Seminar for first year students on Artificial Intelligence in Healthcare. I am the sole instructor for this course, and designed the syllabus, lectures, and assignments.

2018 **Research Mentor**, Long Le, B.S. in Computer Science, University of Massachusetts Amherst.

2017-2018 **Research Mentor**, Nikhil Titus, M.S. in Computer Science, University of Massachusetts Amherst.

2018 **Research Mentor**, UMass CICS Industry Mentor Program.

2014 - 2015 DePaul University Graduate Ambassador for prospective students

2014 - 2015 DePaul Tutor for undergraduate students

Organization

2018 - present Organizer, UMass CICS Machine Learning and Friends Lunch.

Reviewing

2018 American Journal of Preventative Medicine (AJPM), American Medical Informatics Association (AMIA) Annual Symposium, Journal of Medical Internet Research (JMIR)

2017 Journal of Medical Internet Research (JMIR)
